Objective

A Computer Scientist position with Microsoft Corporation where I can use organizational skills, software and hardware knowledge in electronics and education in Computer Science, Computer Systems and Game Development to help company development and build on the graphical interface operating system, Windows.

Qualifications

- Responsible and eager to learn.
- Hardworking, honest and trustworthy.
- Great organizational skills.
- Knowledgeable with Microsoft Office, Adobe and Windows programs.
- Ability to perform software repair and data retrieval tasks on computers.
- Multilingual: English and Arabic.

Experience

Porter   Best Western Lamplighter Inn, 2012
- Organized and planed different events such as, business conference events and weddings, providing the customers with the traditional Best Western excellent customer service.

Technician   Daisy Point Incorporated, 2011
- Sat-up, troubleshot, and organized the store's wireless network resulting in an improved customer satisfaction and enhanced transaction process through the debit machines.

Technician   Dollarena Plus, 2010
- Installed, monitored and maintained the store's security surveillance system contributing to a decrease in the damaged/lost products and a lower store insurance rate.

Education and Trainings

Bachelor of Computer Science   Western University Ontario – in progress
    (Honors Specialization in Computer Science)
    (Honors Specialization in Computer Systems)
    (Minor in Game Development)
WHMIS   Best Western Lamplighter Inn, 2012
Smart Serve   Best Western Lamplighter Inn, 2012
AODA and Best Western I Care Customer Service Training   Best Western Lamplighter Inn, 2012
YMAP Integration and Leadership program   YMCA, 2010

Activities/Interests

Soccer, basketball, beach volleyball, skiing, and gaming.

Re: Computer Scientist/February 11, 2013

Dear Mr Bugs Bunny:

I am interested in the position of the Computer Scientist with Microsoft Corporation as advertised in Looney Tunes Newspaper and I have skills and experience applying and using a multitude of computer languages to develop programs for various platforms.

My skills and experiences would contribute to your organization by programming with high-end computing algorithms and problem solving techniques that will maintain and support the leadership position of Microsoft. Throughout my coursework at Western University I have learned to build, maintain, and develop several high and low programming languages such as Touring, Visual Basics, HTML, CSS, and Java computer languages. I have also applied my programming algorithms in these languages on multiple platforms including phones, tablets. In addition, I am knowledgeable with databases, networking and website designing.

I look forward to meeting with you to discuss how I can contribute to Microsoft Corporation and the position of Computer Scientist.

Sincerely,

Zaid Albirawi
